Consumers will also benefit from this solution, enjoying expanded access to sales promotions and preferred discounts, regardless of whether they are shopping online or in-store. During the past three months, JD.com also formed strategic partnerships with Baidu, Qihoo 360, NetEase, Sogou and iQIYI, leveraging these companies’ powerful big data resources, massive user bases and AI algorithm technologies to strengthen collaboration in precision marketing, user access points and content marketing.

## Non-GAAP Measures

In evaluating the business, the company considers and uses non-GAAP measures, such as non-GAAP gross profit, non-GAAP income/(loss) from operations, non-GAAP operating margin, non-GAAP net income/(loss) attributable to ordinary shareholders, non-GAAP net margin, free cash flow, non-GAAP EBITDA, non-GAAP EBITDA margin, non-GAAP net income/(loss) per weighted average number of shares and non-GAAP net income/(loss) per ADS, as supplemental measures to review and assess operating performance. The presentation of these non-GAAP financial measures is not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP"). The company defines non-GAAP gross profit as the difference of net revenues and cost of revenue excluding revenue from business cooperation arrangements with equity investees and share-based compensation included in cost of revenues. The company defines non-GAAP income/(loss) from operations as income/(loss) from operations excluding share-based compensation, amortization of intangible assets resulting from assets and business acquisitions, revenue from business cooperation arrangements with equity investees and impairment of goodwill and intangible assets. The company defines non-GAAP net income/(loss) attributable to ordinary shareholders as net income/(loss) attributable to ordinary shareholders excluding share-based compensation, amortization of intangible assets resulting from assets and business acquisitions, revenue from business cooperation arrangements with equity investees, gain on disposals of business, preferred shares redemption value accretion, income from non-compete agreement, reconciling items on the share of equity method investments, net income attributable to mezzanine classified non-controlling interest shareholders, impairment of goodwill, intangible assets and investments. The company defines free cash flow as operating cash flow adding back the impact from JD Finance related credit products included in the operating cash flow and less capital expenditures, which include purchase of property, equipment and software, cash paid for construction in progress, purchase of intangible assets and land use rights. The company defines non-GAAP EBITDA as non-GAAP income/(loss) from operations plus depreciation and amortization excluding amortization of intangible assets resulting from assets and business acquisitions.

The company presents these non-GAAP financial measures because they are used by management to evaluate operating performance and formulate business plans. Non-GAAP gross profit, non-GAAP income/(loss) from operations, non-GAAP net income/(loss) attributable to ordinary shareholders and non-GAAP EBITDA reflect the company's ongoing business operations in a manner that allows more meaningful period-to-period comparisons. Free cash flow enables management to assess liquidity and cash flow while taking into account the impact from JD Finance related credit products included in the operating cash flow and the demands that the expansion of fulfillment infrastructure and technology platform has placed on financial resources. The company also believes that the use of the non-GAAP financial measures facilitates investors to understand and evaluate the company's current operating performance and future prospects in the same manner as management does, if they so choose. The company also believes that the non-GAAP financial measures provide useful information to both management and investors by excluding certain expenses, gain/loss and other items that are not expected to result in future cash payments or that are non-recurring in nature or may not be indicative of the company's core operating results and business outlook.

The non-GAAP financial measures have limitations as analytical tools. The company's non-GAAP financial measures do not reflect all items of income and expense that affect the company's operations or not represent the residual cash flow available for discretionary expenditures. Further, these non-GAAP measures may differ from the non-GAAP information used by other companies, including peer companies, and therefore their comparability may be limited. The company compensates for these limitations by reconciling the non-GAAP financial measures to the nearest U.S. GAAP performance measure, all of which should be considered when evaluating performance. The company encourages you to review the company's financial information in its entirety and not rely on a single financial measure.

(1) Due to certain existing contractual arrangement, the company will remain as the legal owner of the existing consumer credit (known as JD Baitiao) receivables, while JD Finance will continue to perform the credit risk assessment services for the individuals and purchase the over-due receivables from the company at carrying value to absorb the risks and obtain the rewards from JD Baitiao business. The company also facilitated JD Finance in various asset-backed securitization ("ABS") to raise fund to support the JD Baitiao business. JD Finance will act as the servicer of the ABS and will also subscribe to the subordinate tranche. Due to the company's continuing involvement right in ABS under the historical arrangement, the company cannot derecognize the existing Baitiao receivables through ABS under U.S. GAAP. In the fourth quarter of 2017, the company revised certain structural arrangements for the issuance of ABS to relinquish its continuing involvement right, so the company will be able to derecognize the Baitiao receivables through the new ABS plan going forward. As a result, the balances of Baitiao receivables are expected to reduce gradually in the future with the adoption of the new ABS plan, and nonrecourse securitization debt will gradually reduce upon the settlement of the original ABS plan.
