## Non-GAAP Measures

In evaluating the business, the company considers and uses non-GAAP measures, such as non-GAAP income/(loss) from operations, non-GAAP operating margin, non-GAAP net income/(loss) attributable to ordinary shareholders, non-GAAP net margin, free cash flow, non-GAAP EBITDA, non-GAAP EBITDA margin, non-GAAP net income/(loss) per share and non-GAAP net income/(loss) per ADS, as supplemental measures to review and assess operating performance. The presentation of these non-GAAP financial measures is not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”). The company defines non-GAAP income/(loss) from operations as income/(loss) from operations excluding share-based compensation, amortization of intangible assets resulting from assets and business acquisitions, effects of business cooperation arrangements, gain on disposals of long-lived assets and impairment of goodwill and intangible assets. The company defines non-GAAP net income/(loss) attributable to ordinary shareholders as net income/(loss) attributable to ordinary shareholders excluding share-based compensation, amortization of intangible assets resulting from assets and business acquisitions, effects of business cooperation arrangements and non-compete agreements, gain/(loss) on disposals/deemed disposals of investments, reconciling items on the share of equity method investments, loss/(gain) from fair value change of long-term investments, impairment of goodwill, intangible assets and investments, gain and foreign exchange impact in relation to disposals of long-lived assets and tax effects on non-GAAP adjustments. The company defines free cash flow as operating cash flow adjusting the impact from JD Baitiao receivables included in the operating cash flow and capital expenditures, net of proceeds from disposals of long-lived assets. Capital expenditures include purchase of property, equipment and software, cash paid for construction in progress, purchase of intangible assets and land use rights. The company defines non-GAAP EBITDA as non-GAAP income/(loss) from operations plus depreciation and amortization excluding amortization of intangible assets resulting from assets and business acquisitions. Non-GAAP basic net income/(loss) per share is calculated by dividing non-GAAP net income/(loss) attributable to ordinary shareholders by the weighted average number of ordinary shares outstanding during the periods. Non-GAAP diluted net income/(loss) per share is calculated by dividing non-GAAP net income/(loss) attributable to ordinary shareholders by the weighted average number of ordinary shares and dilutive potential ordinary shares outstanding during the periods, including the dilutive effect of share-based awards as determined under the treasury stock method. Non-GAAP net income/(loss) per ADS is equal to non-GAAP net income/(loss) per share multiplied by two.

The company presents these non-GAAP financial measures because they are used by management to evaluate operating performance and formulate business plans. Non-GAAP income/(loss) from operations, non-GAAP net income/(loss) attributable to ordinary shareholders and non-GAAP EBITDA reflect the company’s ongoing business operations in a manner that allows more meaningful period-to-period comparisons. Free cash flow enables management to assess liquidity and cash flow while taking into account the impact from JD Baitiao receivables included in the operating cash flow and the demands that the expansion of fulfillment infrastructure and technology platform has placed on financial resources. The company also believes that the use of the non-GAAP financial measures facilitates investors to understand and evaluate the company’s current operating performance and future prospects in the same manner as management does, if they so choose. The company also believes that the non-GAAP financial measures provide useful information to both management and investors by excluding certain expenses, gain/loss and other items that are not expected to result in future cash payments or that are non-recurring in nature or may not be indicative of the company’s core operating results and business outlook.

The non-GAAP financial measures have limitations as analytical tools. The company's non-GAAP financial measures do not reflect all items of income and expense that affect the company's operations or not represent the residual cash flow available for discretionary expenditures. Further, these non-GAAP measures may differ from the non-GAAP information used by other companies, including peer companies, and therefore their comparability may be limited. The company compensates for these limitations by reconciling the non-GAAP financial measures to the nearest U.S. GAAP performance measure, all of which should be considered when evaluating performance. The company encourages you to review the company's financial information in its entirety and not rely on a single financial measure.
